WHAT RYNTRA IS

One Solana app for trading, launching and money

Ryntra builds the review, the route and the receipt. The person's own wallet signs every action.

01

Non-custodial

Signed in the user's own wallet. Ryntra never holds or reads a key.

02

Review, then receipt

Every cost before signing; every action ends with a receipt.

03

Chain-true numbers

Figures come from the chain. Unknown is shown as unknown.

04

Built on Solana's best

Jupiter, Meteora, Phoenix and Squads — connected in one place.

THE PLATFORM

One connected Solana platform

Live products, beta features and a clear roadmap. Each card says what works today and what is still missing.

THE PRODUCT

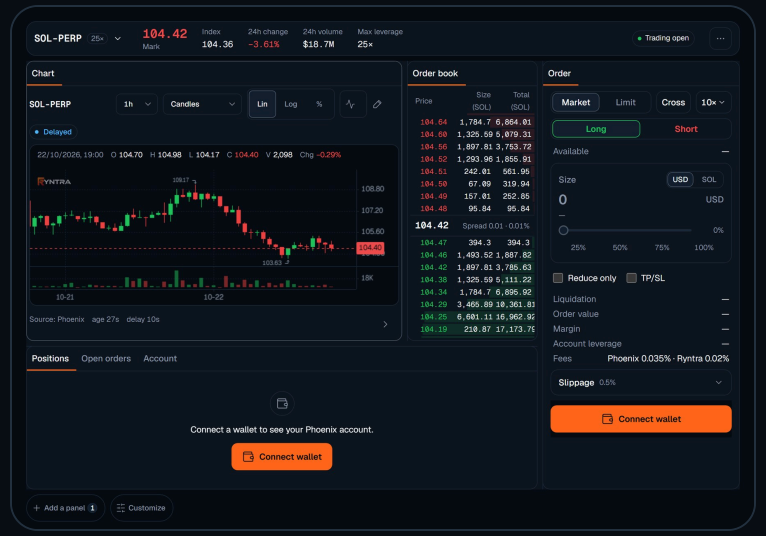

Real screens, from the live product

The trading terminal on Ryntra's own core

Launch a token in three steps and one signature

Perps on Phoenix: long or short, with leverage

THE PARTNER PROGRAMME

Why partner with Ryntra

Your audience gets a complete Solana app. You share in the fees it really produces — counted per pool, with a receipt for every entry.

Shared from real fees

Only from fees Ryntra actually receives — not from posts or promised volume.

One personal link

ryntra.io/r/<code> works for friends and for creators.

A receipt for every entry

Pool, rule version and transactions are kept for each entry.

A product people keep

Trading, stocks, launch, money, assistant and mobile.

WHO WE'RE LOOKING FOR

Four ways to grow with Ryntra on Solana

01

Token creators

Launch a token and build its market.

WHAT YOU GET

Classic launch: 32% of curve fees, 40% of the graduation fee, 50% of the locked liquidity.

LIVE

02

Creator partners

Bring creators with your personal link.

WHAT YOU GET

20% → 10% of Ryntra's part of their pools.

PAYOUTS NEXT

03

Communities & educators

Invite traders and teach the product.

WHAT YOU GET

10–30% of Ryntra's fee on friends' trades, by rank.

LIVE

04

Ecosystem partners

Integrations, data and distribution.

WHAT YOU GET

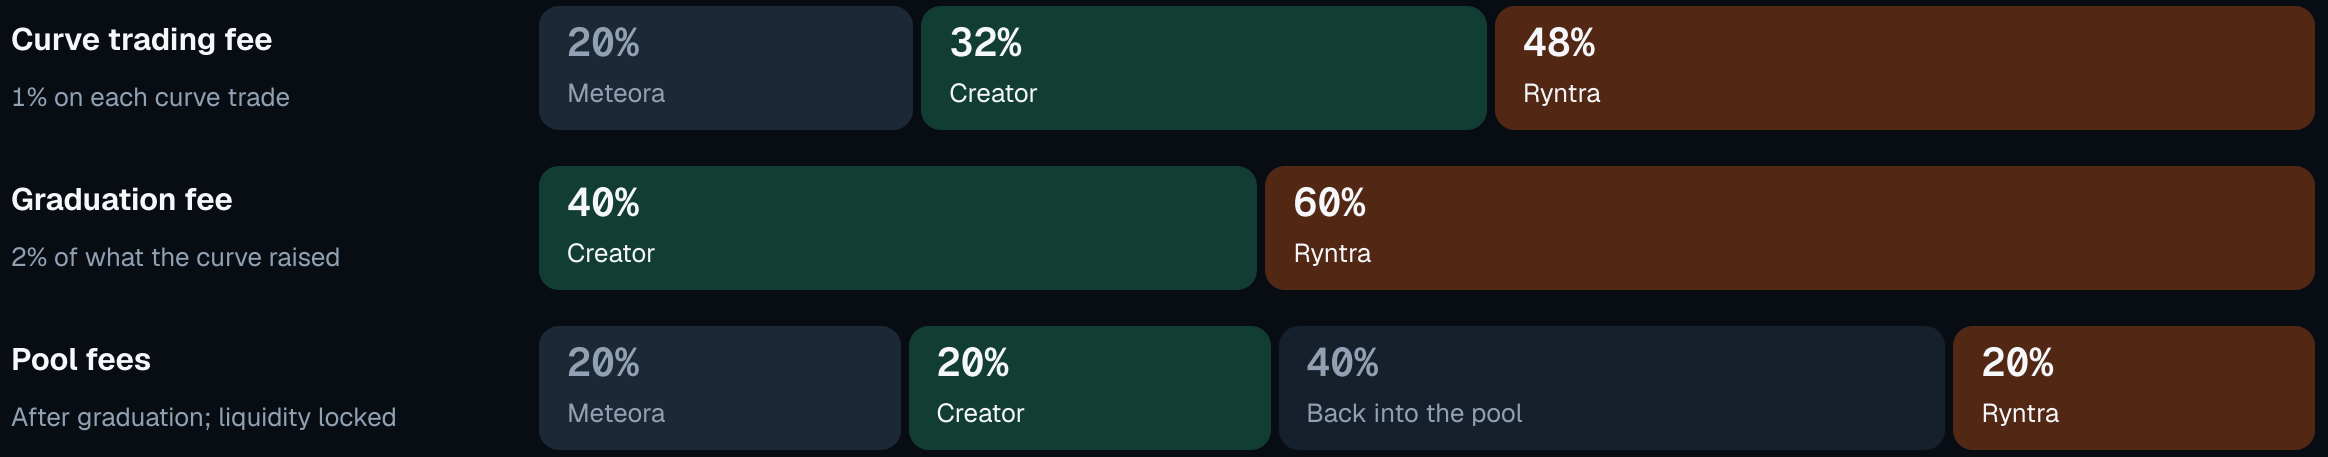

Terms agreed in writing. Public API today, SDK next.

BY AGREEMENT

WHERE THE MONEY COMES FROM

A Classic launch shares its fees — in the open

The token trades on a Meteora curve, then graduates to a Meteora pool. Each fee is split by published rules.

A creator partner's share comes only from Ryntra's part — never from the creator's, never from volume.

Classic and Protected presets; Micro and Advanced split differently. A volatility fee can add to the curve fee; the pool split holds while the locked positions are its liquidity.

FOR CREATORS

Why creators launch on Ryntra

Classic and Protected launches. Three separate things belong to the creator:

32%

of every curve trading fee

40% of what is left after Meteora's 20%. A share of the fee, not of the trade.

40%

of the graduation fee

The 2% fee on what the curve raised, when the market moves to its pool.

50%

of the locked launch liquidity

Ownership of half the pool position locked at graduation — it keeps collecting pool fees.

Simple launch

Three steps and one signature; only Solana's network cost.

Fees known upfront

Every split is published and shown before signing.

A market that stays

Liquidity is locked at graduation — no one can withdraw it.

Creator cabinet

Income by source, a Claim button and alerts.

RULE Partner shares come from Ryntra's part — the creator's share is never reduced.

FOR CREATOR PARTNERS

Bring a creator, share in Ryntra's part of their pool

Free to join — no tokens to buy, no liquidity to add.

STANDARD

20%
first 180 days from the pool's first fee

10%
after that, while the pool brings fees

FOUNDING · FIRST 20 APPROVED

SEATS OPEN NEXT

30%
days 1–90

15%
days 91–365

10%
after that

Counted from

Only fees Ryntra has actually claimed from the pool.

Activation

3+ outside wallets trade $1+ on the curve within 30 days.

Payout

USDC on Solana, minimum $1, after 14 days pending.

Cap

All payouts from one pool stay within 40% of Ryntra's part.

RULES	ACCRUAL	PAYOUTS

A WORKED EXAMPLE

From Ryntra's revenue to a partner's share

Type what Ryntra receives from the pool of a creator you brought. Arithmetic, not a forecast.

Ryntra receives from the pool, $

100

STANDARD PARTNER

$20

20% in the first 180 days, then 10%.

FOUNDING PARTNER

$30

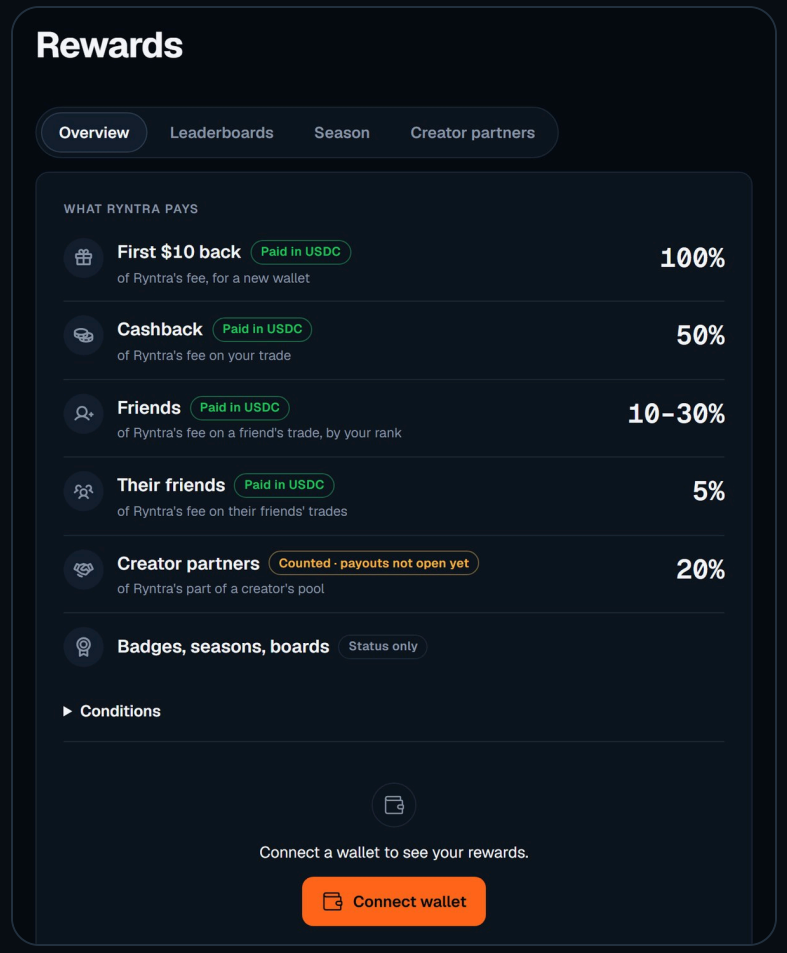

30% in days 1–90, 15% to day 365, then 10%.

In the pool	Earned	Pending 14 days	Available	Paid in USDC

Arithmetic, not a forecast. Amounts depend on the fees Ryntra actually receives, the creator's activation and the terms in force. Shares are counted today; payouts open after Ryntra's first test payout.

FOR TRADERS & FRIENDS

Rewards that come back to the people who trade

100%

First $10 back

All of Ryntra's fee until $10 has returned — first 100 new wallets a month, up to 30 days; half at once, the rest after a check.

50%

Cashback

Of Ryntra's fee on spot, swap and stock trades, from the first trade.

10–30%

Friends

Of Ryntra's fee on a friend's trade, by rank; 30% in a friend's first 90 days; none during their First $10 back.

5%

Their friends

Of Ryntra's fee on their friends' trades.

Trade rewards stay within 85% of the fee Ryntra received (100% in First $10 back).

PARTNER TOOLS & RULES

Everything a partner needs — and rules that protect your name

Personal link

Rewards → Creator partners gives ryntra.io/r/<code>. The creator sees «Invited by» before signing.

Media kit

The brand, the launch fee rules and ready words to post.

Weekly boards & badges

Boards for traders, friends and creators; badges at 1, 3, 10 and 25 activated creators.

Seasons

8-week seasons with tasks start next.

No pay for posts

Shares come only from creators who launched with your link.

No profit promises

No promises of income or price, and no price predictions — from Ryntra or from partners.

Review, not a ban

Wash trading goes to a person; proven manipulation cancels the reward.

Versioned terms

Change only by a new version, with notice. What was earned stays.

Marked as an ad

Partner posts carry «Ad» or «Paid Partnership».

No self-referral

Your own and your team's wallets earn nothing.

BUILT AND TESTED

Real product, real checks

No invented users or volumes — only what was measured and checked.

9,138

automated tests
